

## Customer Information: Label-Check

Passing the label-check is the requirement for the conduction of analysis.

The following criteria apply for the Label-Check:

- Products have to be in the original packaging
- The packaging has to be available in English or German language or a translation in one of these languages has to be attached
- Products that are personalized or individualized are Not analysed

Products, that meet one of the following criteria are NOT analysed:

1. The packaging indicates at least one ingredient or its synonym that is listed on the World Anti-Doping Agency's (WADA) prohibited list
2. The packaging indicates at least one ingredient or its synonym that is in any way doping-relevant according to WADA recommendations (e.g. colostrum)
3. The packaging indicates at least one ingredient or its synonym that might contain doping substances (e.g. hemp, citrus aurantium)
4. The packaging displays at least one description that suggests doping-relevance (e.g. andro, testo, anabol)
5. The packaging indicates at least one ingredient or its synonym that is advertised with doping-relevant effects or is linked to such effects (e.g. Tribulus terrestris)
6. The packaging indicates at least one ingredient or its synonym that caused several positive findings in the past (e.g. Rhodiola Rosea)
7. The packaging displays formulations that explicitly or analogously suggest the product to be guaranteed doping-free (e.g. doping-free, harmless, 100% secure/reliable, pure ns)

ZePräDo retains the right to reject the analysis of several samples in case the expert committee\* evaluates the products' design as inconsistent with the philosophy of clean performance.

\*The expert committee is made up of scientists, physicians, marketing specialists, representatives of the field of sport and the NADA
