Zentrum für Präventive Dopingforschung Center for Preventive Doping Research

Customer Information: Label-Check

Passing the label-check is a first-level requirement for conducting a subsequent chemical analysis.

For the Label-Check, the following criteria apply:

- Only products provided in the original packaging are accepted
- The description on the packaging must be available in English or German language or a translation in one of these languages has to be attached
- Products that are personalized or individualized are <u>NOT analyzed</u>

Products that meet one of the following criteria are NOT analyzed:

- 1. The packaging indicates one or more ingredients or its synonyms that are listed on the World Anti-Doping Agency's (WADA's) Prohibited List or is subject of WADA's Monitoring Program
- 2. The packaging indicates one or more ingredients or its synonyms that are in any way doping-relevant according to WADA recommendations (e.g. colostrum)
- 3. The packaging indicates one or more ingredients or its synonyms that might contain doping substances (e.g. hemp, citrus aurantium)
- 4. The packaging features one or more descriptions that suggest doping-relevance (e.g. andro, testo, anabol)
- 5. The packaging indicates one or more ingredients or its synonyms that are advertised with doping-relevant effects or are linked to such effects (e.g. Tribulus terrestris)
- 6. The packaging indicates one or more ingredients or its synonyms that caused several positive findings in the past (e.g. Rhodiola Rosea)
- 7. The packaging features formulations that explicitly or analogously suggest the product to be guaranteed doping-free (e.g. doping-free, harmless, 100% secure/reliable, pure ns)
- 8. The packaging indicates ingredients or its synonyms that are active ingredients of a prohibited substance (e.g. DMAE = dimethylaminoethanol)

ZePräDo retains the right to reject the analysis of several samples in case the expert committee* evaluates the products' design as inconsistent with the philosophy of clean performance.

^{*}The expert committee is composed of scientists, physicians, marketing specialists, representatives of the field of sport and the NADA
